## Glossary

**Annualised Alpha** - A risk-adjusted return a security or a portfolio would be expected to earn if the market rate of return were zero.

**Annualised Information Ratio** - This measure evaluates the return a fund manager achieves, given the risk they take on.

**Annualised Sharpe Ratio** - A measure of return adjusted for the amount of risk that has been taken. The higher the Sharpe Ratio, the better the portfolio's return in risk adjusted terms.

**Annualised Volatility** - The extent of fluctuation in an investment portfolio, etc. on an annualised basis.

**Beta** - A measure of market sensitivity - i.e. the extent to which a share or a portfolio fluctuates with the market. A fund with a beta of 1 would perform in line with the market.

**Decile** - 1st decile means ranked in top 10%, 2nd means ranked in next 10% and so on.

**Quartile** - 1st quartile means ranked in the top 25%, 2nd means ranked in the next 25% and so on

**R Squared** - A measurement of how closely a portfolio's performance correlates with the performance of a benchmark index.

**Ratings** - Ratings are provided by independent rating agencies based on a number of investment criteria. For example, where applicable, a "AAA" rating is the highest possible for Standard & Poor's and Citywire. A 5 star rating is the highest possible for fund star

ratings. For a full description of the ratings please see the Gartmore website.

**Distribution Yield** - The Distribution Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the mid-market share price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions.

**Historic Yield** - The Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown.

**Underlying Yield** - The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market share price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions.

## Risk profile

This Fund invests in shares, which are more volatile than other asset classes such as cash or bonds. The Fund may hold concentrated positions. If one of these concentrated positions declines in value, or is otherwise adversely affected, this can have a greater effect on the Fund's value than if it held less concentrated positions. The investment approach for this Fund may involve a high level of investment activity and turnover of investments, which may generate substantial transaction costs which will be borne by the Fund. As the Fund invests abroad, it is exposed to changes in exchange rates which may cause the value of investments to fall or rise independently of the underlying holdings. The Fund may trade instruments, the performance of which depends on the continued solvency of the counterparties to the trades.

Please read the Simplified Prospectus before investing.
